Chapter 2 Home Investigation: Converters and Forms of Energy

Directions:

1. Look for energy converters (electrical devices) in your home. See how many you can find. List them in the first column of the table below.
2. In the second column, record the output energy form for each energy converter. (Remember: output energy is the form of energy that an electrical device converts electrical energy into).

Energy converter	Output energy forms
toaster	thermal energy, light energy
